00 — OVERVIEW

EXECUTIVE SUMMARY

SIX CATEGORIES · ASSETS AND ISSUERS, NOT BLOCKCHAINS

This report is published by RWA Foundation using data from Token Terminal. It covers six categories of onchain real-world assets: **stablecoins, tokenized funds, tokenized credit, tokenized commodities, tokenized stocks, and tokenized ETFs**. All figures are trailing 30-day figures as of the report date unless otherwise noted.

The scope of this report is assets and their issuers, not blockchains. Each section ranks the top 10 assets and top 10 issuers within a category by 30-day market cap growth, and, where Token Terminal tracks it, market share by asset and by issuer. No chain-level or protocol-level infrastructure metrics (transaction volume, fees, active addresses, and so on) are included; this is a market structure view of the assets themselves and the entities that issue them.

Stablecoins remain by far the largest category tracked, at **\$298.8B across 189 assets**, with USDT and USDC together holding 86% of the market. Tokenized commodities (\$7.5B, 21 issuers, concentrated in gold), tokenized stocks (\$2.9B, 3,449 assets, 22 issuers), and tokenized ETFs (\$615.2M, 694 assets) are smaller and, in the case of stocks and ETFs, far more fragmented at the asset level. Tokenized funds and tokenized credit are presented by 30-day growth rather than total market cap, as Token Terminal's market share view was not available for those two categories at the time of writing.

Across every category, 30-day growth is concentrated in a small number of issuers: **the largest gainer in each sector added more than double the next-largest gainer in five of the six categories**. A recurring set of issuers, among them Ondo Finance, xStocks, Securitize, Centrifuge, Robinhood, Dinari, Reality, and Superstate, appear across multiple asset categories, pointing to a small group of infrastructure providers active across the tokenization stack rather than single-category specialists.

Several issuers referenced throughout this report, including OnRe, Dinari, Securitize, Maple Finance, and PreStocks are members of RWA Foundation but have no influence on the opinions of this report.

01 – STABLECOINS

STABLECOINS

189 ASSETS · USDT + USDC HOLD 86% OF THE MARKET

\$298.8B

The stablecoin market stands at **\$298.8B across 189 tracked assets**. USDT retains clear dominance at 61.3% share, with USDC second at 24.7%. The long tail (USDS, USD1, USDe, USDG, PYUSD, RLUSD, USDf, USDD, and others) collectively holds under 14% of the market.

Growth over the past 30 days tells a concentrated story: **USDC added by far the most in absolute terms (+\$2.1B)**, more than double the next-largest gainer, RLUSD (+\$768.7M). USDe, U, USDS, USD1, USDGO, USDtb, rwaUSDi, and PYUSD completed the top ten asset gainers, each adding between \$86M and \$201M.

At the issuer level, Circle led all 30-day growth (+\$2.1B), driven by USDC, followed by Ripple (+\$768.7M) on the back of RLUSD. Ethena added +\$325.9M, notably more than USDe's own +\$200.7M, suggesting Ethena's growth spans products beyond that single asset. United Stables, Sky (issuer of USDS), World Liberty Financial (issuer of USD1), Anchorage Digital, Multipli, Paxos, and USDai completed the top ten issuer gainers.

02 - TOKENIZED FUNDS

+\$256.3M

TOKENIZED FUNDS

TOP ISSUER GAIN · GROWTH VIEW - PAST 30 DAYS

Tokenized funds saw concentrated growth over the past 30 days. **WisdomTree led all issuers with +\$256.3M**, well ahead of Hastra (+\$96.4M), Sky (+\$94.1M), and Tradable (+\$86.7M). USDai, Re, OnRe, Securitize, Centrifuge, and Ondo Finance made up the rest of the top ten issuer gainers, each adding between \$24.5M and \$78.0M.

At the asset level, WisdomTree's WTGXX fund led all gainers (+\$254.9M), tracking closely with the issuer-level figure above. BlackRock's BUIDL followed at +\$125.9M, then sUSDS (+\$99.1M), PRIME (+\$96.4M, Hastra's product), sUSDai (+\$78.0M), reUSD (+\$51.8M), BRsrv (+\$50.1M), syrupUSDG (+\$42.4M), USDY (+\$39.2M), and PC188814458 (+\$38.5M) completed the top ten.

03 - TOKENIZED CREDIT

+\$96.4M

TOKENIZED CREDIT

TOP ISSUER GAIN · GROWTH VIEW - PAST 30 DAYS

Growth in tokenized credit was led by three issuers well ahead of the rest of the field. **Hastra added +\$96.4M** over the past 30 days, followed closely by Tradable (+\$86.7M) and USDai (+\$78.0M). Centrifuge (+\$25.5M) and 3Jane (+\$7.5M) were the only other issuers with meaningful gains, while Nest, Rivool Finance, and Textile each added under \$400K. Superstate (-\$1.0M) and Accountable (-\$4.5M) were the sector's only two decliners over the period.

At the asset level, Hastra's PRIME led all gainers (+\$96.4M), tracking directly with the issuer figure above. USDai's sUSDai followed at +\$78.0M, then Maple's syrupUSDG (+\$42.4M). The remainder of the top ten was dominated by **Tradable's tokenized private credit pools** (labeled PC188814458, PC0000053, PC0016245, PC3729409, PC0000027, and PC0000049), each adding between \$16.0M and \$38.5M, with Janus Henderson's JAAA (+\$23.0M) the lone non-Tradable pool in that stretch.

04 - TOKENIZED COMMODITIES

\$7.5B

TOKENIZED COMMODITIES

21 ISSUERS · CONCENTRATED ALMOST ENTIRELY IN GOLD

Tokenized commodities stand at **\$7.5B across 21 issuers**, concentrated almost entirely in gold. Tether leads with 37.6% share, followed by Justoken at 29.6% and Paxos at 25.5%; these three issuers alone account for over 92% of the sector. Kinesis holds 3.2%, with Pleasing Gold, Matrixdock, Goldfish Gold, Ondo Finance, StreamEx, and xStocks splitting the remaining share, each under 1.2%.

Growth over the past 30 days was led by **Tether's XAUT (+\$228.7M)**, more than double the next-largest gainer, Paxos's PAXG (+\$103.2M). Goldfish Gold's GGBR (+\$31.5M) and Kinesis's KAU (+\$22.2M) followed, then Pleasing Gold's PGOLD (+\$6.6M) and Matrixdock's XAUM (+\$4.0M). GLDon, SLVon, XAUTO, and GLDx filled the remaining spots in the top ten asset gainers, each adding under \$4M.

At the issuer level, the growth ranking mirrors market share almost exactly: Tether (+\$230.6M), Paxos (+\$103.2M), Goldfish Gold (+\$31.5M), and Kinesis (+\$22.5M) led, with Pleasing Gold, Matrixdock, Ondo Finance, xStocks, Robinhood, and StreamEx completing the top ten, each adding between \$1.1M and \$6.6M.

05 – TOKENIZED STOCKS

\$2.9B

TOKENIZED STOCKS

3,449 ASSETS · 22 ISSUERS · A FRAGMENTED LONG TAIL

Tokenized stocks stand at **\$2.9B across 3,449 assets and 22 issuers**. By issuer, Ondo Finance leads with 32.4% share, followed by xStocks at 23.3% and Binance at 21.4%; these three account for over 77% of the sector. Reality (5.8%), Securitize (5.7%), Robinhood (2.6%), Republic (2.5%), Superstate (1.5%), NYALA Digital Assets (0.9%), and Dinari (0.8%) make up the remainder. By asset, the market is far more fragmented: the top ten tickers (led by SECZ at 5.7% and STRCx at 5.1%) together hold under 31% of the market, with "Other" spanning the remaining 3,439 assets at 69.2%.

Growth over the past 30 days was led by **xStocks (+\$92.2M)**, more than double the next issuer, Reality (+\$32.4M). Robinhood (+\$25.2M) and Superstate (+\$12.9M) followed, then Coinbase, Dinari, PreStocks, NYALA Digital Assets, Republic, and Reserve made up the balance of the top ten issuer gainers, each adding under \$9M.

At the asset level, growth was concentrated in tokenized equities and ETFs from a handful of issuers: MSTRb led (+\$35.4M), followed by CRCLb (+\$23.7M) and GOOGLb (+\$20.7M). CRCLon, CRCLx, SPYb, rGOOGL, MSTRx, rINTC, and FWDI completed the top ten, each adding between \$12.9M and \$18.5M, with **Circle-linked tickers (CRCLb, CRCLon, CRCLx) appearing three times in the top ten**.

06 — TOKENIZED ETFS

\$615.2M

TOKENIZED ETFS

694 ASSETS · FRAGMENTED AT THE TOP

Tokenized ETFs stand at **\$615.2M across 694 assets**. The market is fragmented at the top: IVVon (iShares Core S&P 500) leads at 11.4% share, followed by SPYx (8.3%) and SPYon (7.4%), both tracking the SPDR S&P 500 ETF through different issuers. QQQon, QQQx, and QQQb (5.3%, 5.0%, and 5.0%) track the Nasdaq-100, while IBITon (4.2%), SPYb (3.3%), TLTon (3.1%), and DRAMB (2.9%) fill the remaining top ten spots. The remaining 684 assets collectively hold 43.9% of the sector.

Growth over the past 30 days was led by **SPYb (+\$18.3M)**, more than double the next-largest gainer, QQQb (+\$7.6M). SPYx (+\$5.9M), USFR (+\$5.1M), and SPY (+\$4.6M) followed, then IVVon, SPYon, QQQ, SGOVon, and rQQQ completed the top ten asset gainers, each adding under \$3.3M.

At the issuer level, xStocks (+\$7.2M) and Robinhood (+\$7.1M) led by a narrow margin, followed by Dinari (+\$5.3M), Reserve (+\$1.9M), and Reality (+\$1.5M). Centrifuge, stOx, Backed Finance, Swarm Markets, and StableStock completed the top ten issuer gainers, each adding under \$600K.

CLOSING REMARKS

Taken together, the six categories in this report describe a market that is still concentrated at the top and long-tailed underneath. Stablecoins are the most mature and the most concentrated: two issuers, Circle and Tether, define the category, and growth over the past 30 days continued to favor the incumbents (USDC's +\$2.1B alone exceeded the combined growth of the next four asset gainers). Tokenized commodities show a similar pattern one level down in size, with Tether, Justoken, and Paxos accounting for over 92% of share.

Tokenized stocks and tokenized ETFs sit at the opposite end of the fragmentation spectrum. With 3,449 and 694 tracked assets respectively, no single ticker holds more than 12% of either market, and a majority of both categories' market cap sits in a long tail labeled "Other." This reflects the sheer breadth of individual equities, ETFs, and indices being tokenized by issuers such as xStocks, Ondo Finance, Binance, Dinari, and Republic, each pursuing a different slice of traditional markets onchain.

Tokenized funds and tokenized credit, the two categories without a disclosed total market cap in Token Terminal's data at the time of writing, nonetheless showed some of the most concentrated 30-day growth of any sector: three issuers (WisdomTree, Hastra, and Sky in funds; Hastra, Tradable, and USDai in credit) accounted for the large majority of new growth in each category, with Tradable's tokenized private credit pools alone filling six of the top ten asset gainers in tokenized credit.

"The tokenization market is coalescing around a set of multi-category infrastructure providers."

A handful of issuers, Ondo Finance, xStocks, Securitize, Centrifuge, Robinhood, Dinari, Reality, and Superstate among them, recur across three or more of the six categories tracked here. That overlap suggests the tokenization market is coalescing around a set of multi-category infrastructure providers, alongside category specialists such as Circle and Tether in stablecoins or Tradable and Hastra in credit.

This report reflects a single 30-day snapshot and will be superseded by RWA Foundation's subsequent editions. Figures are sourced entirely from Token Terminal and are subject to that platform's own tracked-asset coverage and methodology at the time of writing.

Disclaimer. All data in this report is sourced strictly from Token Terminal. Figures reflect Token Terminal's own tracked-asset universe, categorization, and methodology as of the report date; other data providers may track a different set of assets or calculate market cap and growth differently, and totals or rankings in this report may not match those published elsewhere.
